

MEDICAL DEVICE CYBERSECURITY CONSULTING

Solving for medical device cybersecurity goes beyond technology. MedCrypt is available as a partner in your transformation toward proactive security.

THE BUSINESS CASE FOR CYBERSECURITY

Leading medical device manufacturers (MDMs) are transforming their organizations to achieve more efficient, proactive device-based security in response to technology-driven innovation, changing regulatory requirements, and evolving customer demand.

Transformation cannot be achieved with technology alone; it requires organizational change spanning people, process, & technology across the full product lifecycle.

HEALTHCARE FIRST CONSULTING

MedCrypt synthesizes technical, strategic, and regulatory expertise to achieve proactive security that supports the bottom line. Our insights are delivered seamlessly to key decision-makers, building coalition and reproducible so device manufacturers can measure whether they have “done enough” security, are doing it efficiently, and can sustain the change.

Our team exclusively focuses on medical device cybersecurity with expertise in management consulting and regulatory strategy. We measure success based on the business value to our customers, utilizing industry-recognized standards and frameworks.

CONSULTING SERVICES (SELECTED)

① MATURITY ASSESSMENT & STRATEGY

With a maturity assessment we can help identify the right areas for security ROI. Maturity assessments can be done at the corporate, business unit, or acquisition target level.

② VULNERABILITY MANAGEMENT PROCESS ENGINEERING

When the next widespread vulnerability hits, will you be able to answer “which devices are impacted?” We improve quality, efficiency, and usefulness of SBOM management and vulnerability response.

③ THREAT MODELING & SECURITY ARCHITECTURE REVIEW

Threat modeling is an art requiring cybersecurity expertise and a deep understanding of a device’s architecture and usage. We help standardize the process to produce quality results every time, reducing security blindspots.

④ REGULATORY STRATEGY

We develop and improve clients’ regulatory strategy to smooth the path to market for new products and maintain market share for existing products.
